Titan Fibre Networks

Dark Fibre Solutions

January 2025

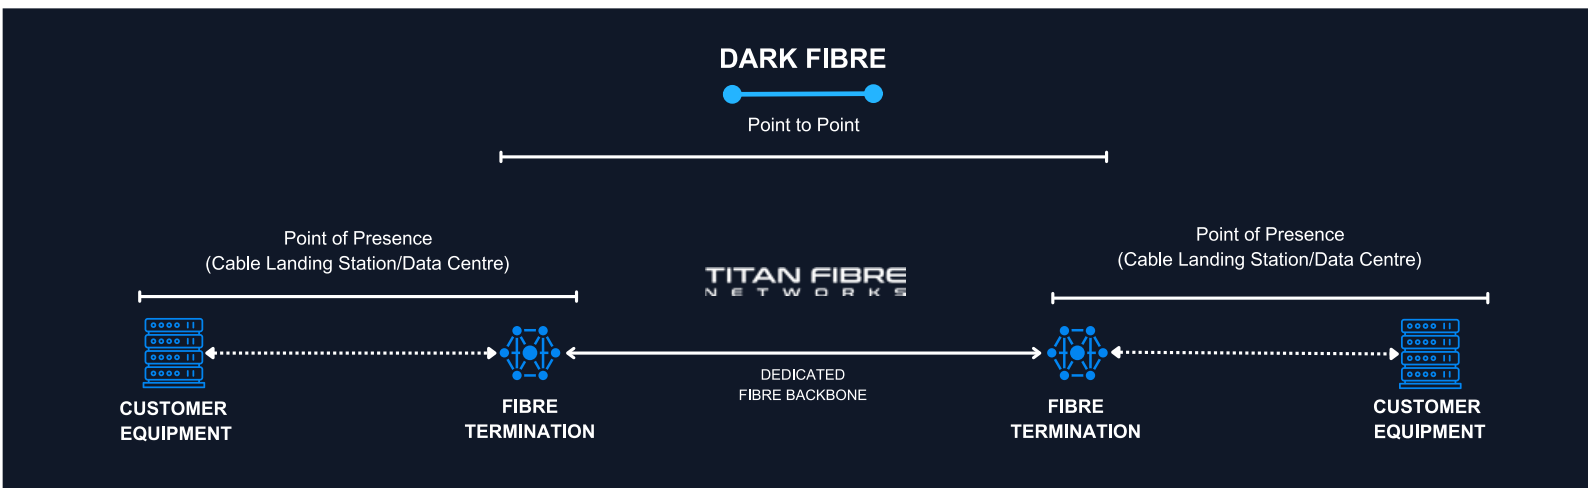

Our Dark Fibre Solutions

Designed specifically for Network Service and OTT Providers, Titan Fibre Networks' Dark Fibre service offers dedicated, secure, point-to-point connectivity on a dedicated fibre pair allowing maximum flexibility in use. By leveraging your own equipment, Titan Fibre Networks' Dark Fibre service provides customers with maximum capacity, control and scale. Combined with our always-on service assurance you can ensure minimal down time and time to restore, providing complete assurance for your critical communications.

Point to Point

Titan Fibre Networks' Point to Point Dark Fibre facilities connectivity between two locations on the Titan Fibre Networks' backbone. Allowing the efficient delivery of a connectivity to any major datacentre in Southeast Queensland, with eleven on-net datacentre and cable landing sites, Titan Fibre Networks' is connected where you need it.

Always on Assurance

Through the use of Exfo's Fibreguardian, Titan Fibre Networks is constantly monitoring and probing for fibre degradation events allowing for streamlined operations and maximum uptime.

Bespoke Routes

With over 144 kilometres of fibre deployed through South East Queensland linking major carrier neutral datacentres, and points of interest such as Cable Landig Stations, Titan Fibre Networks' can support your networks requirements.
